

# CSN<sup>®</sup> contactor tap control type STS

## DESCRIPTION

Our CSN<sup>®</sup> contactor tap controller offers reliable and robust power control for various applications. With multi-stage control through fixed stages, this product is particularly suitable for simple applications where precise and efficient control is required.

## PRODUCT BENEFITS

- Thermostat-controlled via capillary controller in the heater or  
  
PLC controller for a high number of stages or high control requirements
- Coordinated complete package with heater from a single source
- Detailed CAD design with E-Plan P8 and Pro Panel
- PLC programming with Siemens Step 7 / TIA Portal
- Design in accordance with Low Voltage Directive 2014/35/EU and IEC 61439 (low-voltage switchgear and controlgear assemblies)
- In-house, digitalised production
- Components from the market leaders (Siemens, ABB, Jumo, Phoenix Contact, Rittal,...)

## TECHNISCHE DATEN

Performance

1 kW to 20 MW

Tension

230V AC, 400V AC, 690V AC, all special voltages within the Low Voltage Directive (including DC)
