

## CSN® flow heater type 97/D

## DESCRIPTION

CSN® flow heaters can be used in a variety of industrial applications, especially where fast and precise heating of liquids or gases is required. They are used in areas such as the chemical industry and process engineering. These heaters offer fast heating, precise temperature control, compactness, energy efficiency and low maintenance. Overall, they are a reliable solution for optimising industrial processes by increasing efficiency and reducing operating costs.

## PRODUCT BENEFITS

- Low maintenance reducing operating costs and downtime.
- High energy efficiency almost 100% conversion of electrical energy into thermal energy.
- Precise temperature control and monitoring possible in conjunction with electronic controls.
- Manufactured in accordance with Pressure Equipment Directive 2014/68/EU.
- High operational safety and reliability
- Good corrosion resistance of the materials

## TECHNISCHE DATEN

Medium Liquid and gaseous

Power 0.5 to 5000 kW

Voltage II0 to 690 V

Process data Medium, pressure and temperature

according to specification

Process connection Flange: NW 40 to 1000

Heating elements Tubular radiators

Cartridge radiators

High-performance cartridge heaters

Materials Heating elements Steel;1.4404 (AISI 316L);

1.4541 (AISI 321); 1.4571 (AISI 316 Ti);

1.4876 (Incoloy 800); 2.4858 (Incoloy 825)

Installation length of cartridge heater Installation length of tubular heating element

Temperature monitoring

150 to 3500 mm

IP00 to IP66

300 to 6000 mm

Temperature controller, temperature limiter, Safety temperature limiter, PTIOO or thermocouples

Protection class

Customised versions on request
