

CSN® Ex flow heater type 95Ex

DESCRIPTION

Our CSN® Ex flow heaters are designed for outputs of up to 2l kW and are ideal for heating flowing liquid and gaseous media. These electric instantaneous water heaters are specially designed for use in potentially explosive environments and provide a reliable and efficient heat source. Thanks to their integrated temperature monitoring, you can precisely control the operating temperature and thus ensure a safe working environment.

PRODUCT BENEFITS

- Integrated, externally accessible temperature monitoring
- Heating elements as tubular heating elements or cartridges
- Approval for Zone I and Zone 2I
- Type of protection Ex det
- Approval according to ATEX and IECEx. Further approvals (Peso, CCC, EAC) available

TECHNISCHE DATEN

Protection class

Authorisation Zone I, Zone 2I

Certification ATEX, IECEx

Temperature class TI to T6

Ambient temperature range Standard -40°C to +40°C

 Power (kW)
 0.2 to 2l

 Voltage (V)
 up to 1000

Medium Liquid and gaseous

Process data Medium, pressure and temperature

IP 66

according to specification

Optional: Peso, CCC, EAC

Housing / inlet and outlet nozzles Flange connections and others

Heating elements Tubular radiators

Cartridge radiators

High-performance cartridge heaters

Housing materials Steel; I.4404 (AISI 3I6L);

1.4541 (AISI 32I); 1.4571 (AISI 316 Ti)

Heating element materials 1.4404 (AISI 316L);

1.4541 (AISI 321); 1.4571 (AISI 316 Ti);

1.4876 (Incoloy 800); 2.4858 (Incoloy 825)

Material of connection cover GGG40.3 (powder-coated)

Installation length of heating elements

(mm)

300 - 3500 for tubular radiators,

up to 6000 for cartridge radiators

Temperature monitoring Temperature controller (standard)

Temperature limiter (standard)
Optional: PTI00, thermocouple

Execution 95F = for liquids

95GB = for gases, Ex zone on heating

element

95GN = for gases, no Ex zone on the heating

element
